Trading as	Nestvested
Company type	Limited company
Incorporated	12 December 2018, Jamaica
Company number	98988
Address	35 Lady Musgrave Road, Building 18, Kingston, Jamaica
Managing Director	Matthew Bowman
Working model	Fully remote
Working language	English
Email	hello@nestvested.co
Telephone	+1 876 881 8780
Website	nestvested.co

What we do

Web design	Research-led design, prototyped early, delivered as a design system that holds in every language and script.
Web development	Sites built to a performance budget and tested to WCAG before launch, on an editing layer your own team runs.
Evidence intelligence	A knowledge layer built on everything your organisation holds, queried in natural language, every answer traced to its source. Hosted on our infrastructure or yours; accuracy benchmarked and published.
Branding	Identity systems that work at 16 pixels and across languages, delivered as guidelines partners can apply without us.
Web maintenance	Continuous operation on a retainer — monthly, quarterly or yearly: updates, security, backups verified by restore, a report every month.

Working with us

A registered company	Contracts and invoices from Nestvested Limited, Kingston, Jamaica. Company documents and references ready to send with the proposal.
Fixed fees in Swiss francs	Agreed before work starts and fixed to scope, not hours. Invoiced on signing, at design sign-off and at launch.
Care plans	Four plans for sites we build or take on, from CHF 1,200 a month, sized to the site at discovery. Monthly, quarterly or yearly.
Evidence, published	An accessibility statement with its test method, performance measured against a budget, and a security note for every site we run. For knowledge systems, the accuracy benchmark.
Senior people only	The people in the first meeting do the work. Any partner is named in the proposal, with their part of the work.

How a project runs

Three stages and four approval points. Nothing is built before you have clicked through a prototype.

Proposal	Send the brief or terms of reference. Within five working days you have a fixed-fee proposal with the timeline and the team named. If it cannot be priced yet, we propose a short discovery instead.
Discovery	Stakeholder and audience questionnaires, a site audit when there is a site, and a discovery document that ends in the project plan: scope, timeline and who approves what.
Delivery	Design, then a clickable prototype before anything is built, then build, launch and care. A weekly 30-minute call, with notes the same day.

Accessibility statement

This statement covers nestvested.co. We aim for WCAG 2.1 level AA. We last tested the site on 4 November 2026.

How it was tested	– Every page type was tested: home, service page, case study, insights list, article, the page-not-found page and this page. – Automated: axe-core, with its WCAG 2.0, 2.1 and 2.2 A and AA rules, and Lighthouse. – Keyboard: scripted key presses through the skip link, the menu, the contact form and the hero's pause button, with a check that focus stays visible. – Widths from 320 to 1,920 pixels, checked for sideways scrolling. – With reduced motion turned on, the hero stays still on its first language.
What we know is not done	– The site has not been tested by a person using a screen reader. – The moving display in the hero is decorative and hidden from screen readers.
Report a problem	Write to hello@nestvested.co and a named person will reply.

Security note

The site runs on Vercel and is served over HTTPS. It has no accounts and no analytics. It sets no cookies of its own. The contact form stores nothing: it opens a message in your own email app. The site loads no outside scripts.

TLS: SSL Labs A+, tested 5 November 2026.
